2009 INDIANA FISHING GUIDE

GOVERNOR: Mitch Daniels

DNR DIRECTOR: Robert E. Carter, Jr.

COMMUNICATIONS DIRECTOR: Phil Bloom

FISH & WILDLIFE DIRECTOR: Glen Salmon

DESIGNER: Rebecca Mauser

PHOTOGRAPHERS: John Maxwell, Frank Oliver

EDITOR: Marty Benson

This is a summary of Indiana fishing regulations. It is designed as a service to anglers and is not intended to be a complete digest of all fishing regulations. Most regulations are subject to change by administrative rule. Contact the Indiana DNR Division of Communications at (317) 233-3853 before reproducing any part of this booklet.

This program receives federal aid in fish and/or wildlife restoration. Under Title VI of the 1964 Civil Rights Act and Section 504 of the Rehabilitation Act of 1973, the U.S. Department of the Interior prohibits discrimination on the basis of race, color, national origin, disability, age or sex. If you believe that you have been discriminated against in any program, activity or facility as described above, please write to the Office for Human Resources, U.S. Fish and Wildlife Service (DOI) Washington, D.C. 20240.

fishing.IN.gov

Dear Fellow Hoosier Angler:

Surveys tell us that more than 750,000 people fish the waters of Indiana each year. The number could be closer to a million when you add in those who are license-exempt. That places our state 14th for number of resident anglers. With some 21,000 miles of fishable streams and more than 450 natural lakes waiting to serve as the destination for the old saying "Gone Fishin'," Indiana is truly an angler's paradise.

Nationally, more Americans fish than play golf and tennis, combined. In fact, if fishing were ranked as a corporation, it would be 47th on the Fortune 500 list. That places revenue gained from the sport well ahead of that from global giants

Microsoft and Time Warner.

Right here in Indiana, fishing generates more than \$800 million each year in retail sales and more than \$1.3 billion in ripple effect, as those dollars work their way through the state's economy. Hoosier fishing generates more than \$93 million in federal tax revenues, more than \$77 million in state and local taxes, and supports more than 14,000 jobs.

For most Hoosier anglers, it's usually enough to know that hungry fish are nearby. But, even when they're not biting, it's worth remembering that in pursuing your favorite pastime, you support an important part of our state's economy. Be proud and spread the word.

Sincerely,

Mitch Daniels
Governor

Statistics from Sportfishing in America

Dear Fellow Hoosier Angler:

Everyone has his or her idea of a perfect day.

It could be landing the job you always wanted. It could be hitting a hole-in-one on the 18th green at your favorite golf course. It could be winning the lottery.

For me, it's any day I get to go fishing.

Outdoor humorist Patrick McManus once wrote: "The two best times to fish are when it's raining and when it ain't."

In other words, any time is a good time to go fishing, and Indiana provides plenty of opportunity.

The northeast corner of the state is blessed with hundreds of natural lakes. Large reservoirs are scattered across the

midsection, from Mississinewa and Salamonie north of Indianapolis, to Monroe and Patoka in southern Indiana. The Blue River is another southern Indiana gem, but there are miles and miles of winding rivers and meandering streams that crisscross the state, and dozens of city reservoirs, park ponds and strip pits here and there. And don't forget the Ohio River along our southern border or Lake Michigan to the northwest.

Regardless if it's in big water or in a small farm pond, we've got fish.

Catfish, bluegill, walleye, coho salmon, largemouth bass, smallmouth bass, rainbow trout, sauger, muskie, yellow perch, northern pike, steelhead.

Indiana has them all and then some.

So get your fishing license, grab a rod and reel, and go fishing ... rain or no rain.

Robert E. Carter, Jr.

Welcome...

Longtime fans of this annual publication will notice that this edition looks different from those of recent years. The difference, of course, is that it's exclusively a *fishing* guide, rather than a fishing-and-recreation guide.

We have returned to making these two must-have publications separate in order to better serve each group of DNR enthusiasts; however, we realize that the two groups overlap, to a large degree. Please make sure to obtain this year's Recreation Guide if you don't already have it—you can probably find one in or around the same place you found this guide. If not, call DNR Customer Service, (317) 232-4200.

Attend the Hoosier Outdoor Experience

Mix a little fly fishing with archery, mountain biking, hiking, kayaking, target shooting, horseback riding, camping or just about any other outdoor activity you can imagine and what do you have?

The Hoosier Outdoor Experience, presented by the Indiana Department of Natural Resources and the Natural Resources Foundation.

The inaugural event is scheduled for Sept. 26-27 at Fort Harrison State Park, a 1,700-acre oasis of woods, water and open green spaces on the outskirts of Indianapolis.

There's never been an event like this in Indiana—two full days to wrap your arms around the great outdoors with hands-on educational opportunities and skill-building activities while focusing on natural resource conservation, outdoor ethics and responsibility.

This large-scale event will have something for everyone, whether you're a newcomer

seeking entry-level information or an experienced outdoor enthusiast looking to recharge your spirit and appreciation of the natural world.

The Hoosier Outdoor Experience brings together the Indiana DNR and Natural Resources Foundation, other government agencies, diverse organizations like Pheasants Forever, the Hoosier Mountain Bike Association, Indiana Deer Hunters Association, the Indiana Wildlife Federation, and dozens of other support groups, all with the shared purpose of showcasing the wealth of outdoor opportunities in the Hoosier state.

Parking and admission to the Experience plus access to all activities, demonstrations and seminars are free to the public.

To keep track of updates and other information for the event, be sure to bookmark hoosieroutdoorexperience.IN.gov.

See you at Fort Harrison!

What's New for 2009

• Fishing in Indiana has entered the computer age, thanks to a Web site recently launched by the DNR. Now anglers can get the lowdown on what's offered at various spots all around the state from the comfort of their home or office, provided they have Internet access.

The Where to Fish Finder at fishing.IN.gov displays location and other information on more than 800 fishing sites across the state. Anglers seeking fishing spots or launching ramps can use the interactive map to zoom in on specific locations, view aerial photos to learn the lay of the land, and click

on icons to get other information. Available information can include area name, availability of ADA access, boat ramp type and fees, permissions and restrictions for boat motors and shore fishing.

The access sites on the map include state properties, county parks, city parks and municipalities. Fee information includes daily-use fee or DNR Lake Permit status. Boats on state park, reservoir or forestry properties need a DNR Lake Permit.

• **Free Fishing Weekend Dates:** This is **June 6-7**. This differs from the traditional dates. Make sure to mark your calendar and

• **Paddlefish Protection:** Emergency fishing regulations to protect paddlefish remain in effect this year. ALL sport snagging, including for paddlefish, is prohibited on the Ohio River. It is now unlawful to take paddlefish under a sport fishing license from any public water in Indiana. For more see page 19.

• **Zebra Mussel Symbol:** This symbol indicates waters known to contain zebra mussels. Always take precautions to prevent

spreading zebra mussels and other aquatic invasive species. See page 29-36 for listings.

GOOD FISHING DOESN'T JUST HAPPEN

The Story of Indiana's Fisheries Program

"Good fishing doesn't just happen."

A better motto for the DNR fisheries section would be hard to find. Yet the simplicity of fisheries biologist Jed Pearson's comment about its mission belies the long hours, research and careful planning logged for the sake of Hoosier anglers. Pearson, a 33-year DNR veteran, heads the District 3 fish management program in northeast Indiana, one of eight such districts in the state.

The fisheries section consists of nearly 40 professional field biologists forming a responsive organization dedicated to maintaining, protecting and enhancing our state's fisheries. The staff focuses on programs of fish management, research and hatcheries.

Managing Indiana's 141,000 acres of lakes, 145,000 acres of Lake Michigan and more than 21,000 miles of fishable streams isn't easy. With an estimated 1 million anglers in the Hoosier state, the stakes are high, but the fisheries staff is up to the task; overall fishing is as good as it's been in decades. That's no coincidence.

Indiana has eight hatcheries, five of the warm-water variety and three cold-water, that raise bass, bluegill, channel catfish, muskie, walleye, salmon and trout. Research and management responsibilities are divided into a northern and southern region.

Even with these considerable resources and a wealth of experience, fisheries challenges are ever-present. Fish-habitat loss, pollution, and undesirable and invasive species will continue to pose threats into the future.

Only through continued research and application of the most modern techniques and equipment can the current trend of quality fishing be continued. Rest assured that DNR fisheries biologists are just as dedicated to providing quality fishing as the most devoted anglers are to catching their product.

Indiana has experienced a number of fishery successes in recent years. This translates to shortening time between bites, bringing more fish and anglers together,

and putting quality fish on the end of the line.

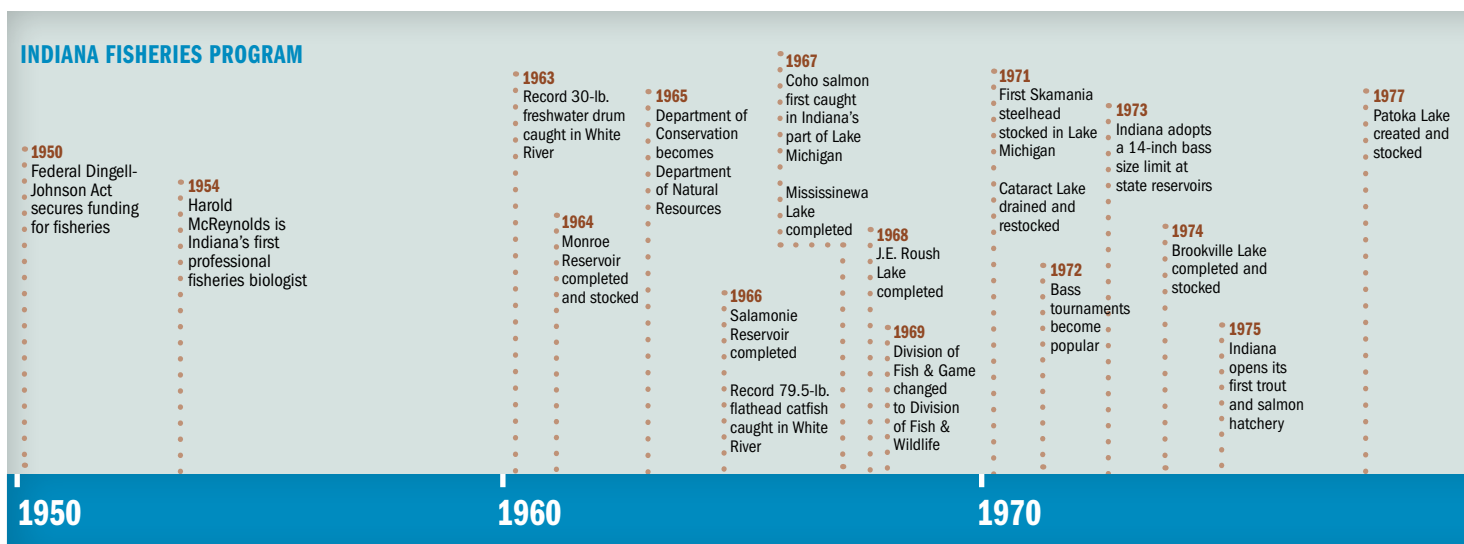

Here are a few recent success stories.

Willow Slough

Also known as J.C. Murphey Lake, this 1,000-acre lake in Willow Slough Fish and Wildlife Area in Newton County was renovated in 2004, meaning sport fish were salvaged and nuisance species were eliminated. Restocked in 2005 with bluegill, redear sunfish, black crappie, largemouth bass and northern pike, it's now more productive than ever. This year's survey showed bluegill and redear populations are flourishing, with bluegill more than 8 inches and redear more than 10 inches present. "It's a bluegill factory," said fisheries biologist Chip Long.

Lake Monroe Wipers

Since 1983 the DNR has stocked 10,750-acre Monroe Lake near Bloomington with hybrid striped bass. Commonly called wipers because they are a cross breed between white bass and striped bass, these hard-fighting fish have become a favorite. Wipers weighing from 3 to 6 pounds are abundant.

Fish weighing more than 10 pounds are not uncommon. To learn more about the habits of these elusive fish, the DNR tracked 30 of them with electronic transmitters from April 2006 to March 2007. Biologists gleaned a wealth of information about the conditions and locations wipers favor during different times of the year.

This research will help the fisheries section learn how best to manage these tenacious game fish, as well as to determine other bodies of water that might support a population. Anglers, however, took a specific interest in one aspect of the study: the maps. Throughout the tracking, the DNR posted maps of the wipers' locations on its Web site. Long known as hard fish to find on the state's biggest body of water, wipers are now easier to find with these maps, fitting gifts from the fisheries section.

Starve Hollow

Gizzard shad, a herring-like forage fish, began showing up in ponds at Driftwood State Fish Hatchery in 1996. Shad in the ponds were interfering with the production of fish, which brought about the risk of accidentally spreading shad while stocking fish raised at the hatchery.

Starve Hollow Lake, near Vallonia in Jackson County, feeds water to the hatchery and was determined to be the source of the shad. Biologists decided the best solution was to renovate Starve Hollow, thus eliminating the shad and the common carp, another undesirable fish, and starting fresh. The DNR started drawing down the lake in September 2008, removing as many game fish as possible beforehand. The remaining

Anglers like these, who pursue fish on Indiana waters, are the beneficiaries of scientific research and planning conducted by the nearly 40 professional fisheries biologists who work for the Department of Natural Resources.

fish were eliminated and the lake re-stocked as soon as biologists deemed it safe. In place of troublesome fish, largemouth bass, bluegill, redear sunfish, channel catfish and black crappie now inhabit Starve Hollow, which also provides a clean water source for the hatchery. With careful management, good fishing will likely materialize. Stay tuned for news of Starve Hollow's return.

Brown Trout

Indiana may not be considered a trout fishing destination, but that's not necessarily bad. Hoosier trout anglers know they have opportunities to pursue this sought-after game fish, minus the crowds that often accompany trout fishing elsewhere.

Though not native to Indiana, trout have been stocked in selected pits, streams and lakes since the 1930s. The DNR (then the

Department of Conservation) first stocked trout in 1943.

Today, one of the most popular places to trout fish is the tailwaters of Brookville Reservoir, near and in the town of the same name. The cold water and rocky stream provide excellent habitat for brown and rainbow trout. Recent cooperative efforts by the DNR, the Army Corps of Engineers, U.S. Fish and Wildlife Service and Central Indiana Trout Unlimited have resulted in an effective stocking program backed by careful management and regulations.

Catching a 10- to 12-inch fish isn't uncommon on the tailwaters and really big trout are starting to show up. How big do the trout get? Find out for yourself, but prepare to be surprised by another DNR fisheries success story.

- **1983**
 - Bodine (Twin Branch) and East Fork hatcheries open
 - Smallest state record caught: a 3.5-oz. flier
- **1984**
 - First steelhead and salmon stocked in St. Joseph River
- **1985**
 - Indiana obtains ownership of part of the Ohio River
- **1991**
 - Record 14-lb., 12-oz. largemouth bass caught from private lake
 - Mussel (clam) harvest closed indefinitely
- **1992**
 - Fish ladders on St. Joseph River become operational
- **1993**
 - Record 35.3-lb. striped bass caught from Ohio River
- **1997**
 - Commercial fishing for yellow perch suspended on Lake Michigan
- **1999**
 - Massive fish kill occurs on White River in central Indiana
- **2002**
 - Record 42.5-lb. muskie caught from James Lake
 - License fees raised for first time in 14 years
- **2008**
 - Fish-kill area on White River renowned for smallmouth bass fishing
 - Brookville tailwaters renowned for brown trout fishing
 - Muskie program drawing anglers from numerous states
 - Monroe Reservoir—a hybrid striped bass and walleye fishing destination
 - Striped bass fisheries thriving at Patoka and Harden lakes
 - Over 300 free public access sites available for the public
 - Senior fishing license enacted

Wonderful Walleye

A fighting, flavorful favorite

Glassy eyes can indicate confusion, but there's no doubt among Hoosier anglers regarding the walleye. It's a winner.

A member of the perch family, the walleye gets its distinctive name from its glassy or "walleyed" stare, which is caused by a reflective layer in the fish's retina. This feature helps the fish see and hunt well in low light.

Of the dozen fish species that the DNR maintains through stocking, the walleye, according to surveys, is the most popular in terms of what anglers wish to see released in Indiana waters. Other game fish such as striped bass, channel catfish, rainbow trout, muskellunge, sauger, and trout and salmon species, while popular, are relegated to the challenger role.

Brown and green in color, the walleye commonly grows to 8 pounds and is prized for its delectable, white, flaky flesh that's a dinnertime hit whether fried, baked or grilled.

And they grow big. Indiana has two state-record walleyes. Each weighed 14 pounds, 4 ounces. The most recent was caught from the Tippecanoe River in Pulaski County in 1977. The original was pulled from the Kankakee River in 1974.

Since walleye natural reproduction is limited in Indiana, to answer the public's wishes, the DNR stocks walleye or hybrid walleye fry and fingerlings in several lakes and one river. The hybrid walleye is a cross between a female walleye and a male sauger, commonly called a saugeye. The hybrids are stocked in two warmer reservoirs, where they survive and grow better than the walleye, which prefers clean and cooler waters.

To allow this process to happen, each spring, Indiana fisheries biologists collect about 30 million walleye eggs from Brookville Lake. After the DNR fish hatcheries work their science, these eggs result in about 17 million walleye fry; 1 million fingerlings, 1-2 inches in size; and 60,000 hybrid walleye fingerlings for stocking.

Catching Walleye

Anglers new to the walleye game, take heart: you can employ many of same techniques with which you are already familiar and need no special rig.

First, remember these fish-eating hunters prefer the deeper waters of lakes and large rivers but move to shallow flats to feed during darker hours.

Boat anglers can cast or troll shad-imitation crankbaits or minnows over flats, points and shorelines during the morning and evening hours. Walleye tend to prefer rock or gravel bottoms. While 6- or 8-pound test line may get you by, many walleye seekers prefer line of 10- to 12-pound test.

A night crawler trolled slowly behind a spinner, near the lake bottom, is often productive. Trolling is one of the best ways to cover large areas for walleye.

Since walleyes tend to school, anglers can often catch several fish in the same area.

Shore anglers should try crankbaits or twister tail jigs in dam tailwaters during late winter and early spring. Early April can be tough because that's typically when walleyes spawn; however, fishing can be really

productive for old "marble-eyes" on either side of the spawning timeout.

Another great approach is drifting a simple night crawler or live minnow rig below a bobber in the river current. Shore anglers also can walk and cast after dark, along dam riprap areas or baysides, with a wind pushing baitfish into bay shoreline areas.

Indiana Walleye Waters

The DNR currently stocks 14 lakes and one river with walleye. County is listed in parentheses.

- Lake of the Woods, (Marshall)
- Lake Maxinkuckee, (Marshall)
- Kokomo Reservoir, (Howard)
- Pike Lake, (Kosciusko)
- Bass Lake, (Starke)
- Eagle Creek Reservoir, (Marion)
- Monroe Lake, (Brown and Monroe)
- Brookville Lake, (Franklin and Union)
- Cagles Mill Lake, (Putnam and Owen)
- Patoka Lake, (Orange, Dubois and Crawford)
- Simonton Lake, (Elkhart)
- Crooked Lake, (Steuben)
- Winona Lake, (Kosciusko)
- Sylvan Lake, (Noble)
- St. Joseph River, (St. Joseph and Elkhart)

Saugeye are stocked in Lake Sullivan, Sullivan County, and Huntingburg Lake, Dubois County.

Other popular Indiana walleye lakes stocked by the DNR in years past are Clear Lake in Steuben County, Lake Maxinkuckee in Marshall County, and Summit Lake in Henry County.

Concentrations of walleye also can be found during spring spawning migrations in rivers below dams at Monroe, Salamonie, Mississinewa, Cagles Mill, and Freeman lakes.

Walleye Rules

Rules for walleye fishing are on page 12.

Walleye are a much sought-after fish for Indiana anglers, who prize this member of the perch family for its delectable flavor.

Wabash River Catfish Research

Catfish probably would not do well in a beauty contest among fish species, depending on the competition, but they sure are popular.

Maybe it's their performance on the dinner plate. Or maybe they have a winning personality?

Perhaps it boils, broils or fries down to two words: size matters.

Whatever the reasons, catfish are the third most-pursued group of sport fish in Indiana, ranking behind only the old favorites—black bass and panfish—in angler preference.

And interest in trophy catfish has skyrocketed in recent years. Judging from the photos on the left, it's easy to see why. Who doesn't like catching big fish?

What's tougher to figure is the prevalence of such monsters in Indiana waters. Because little was known about the abundance, age structure and growth of such line breakers, the DNR conducted research to investigate blue and flathead catfish populations in the Wabash River downstream of Logansport to its confluence with the Ohio River.

Since 2005, nearly 200 blue catfish and more than 1,300 flathead catfish have been sampled. Of those collected, 5 percent of the blue catfish and 2 percent of the flathead catfish measured more than 33 inches. The oldest blue catfish found was determined to have been patrolling the bottom of Hoosier waters for 17 years. The oldest flathead catfish had been around for 27 years.

Twenty percent of the blue catfish sampled were older than 10 years of age, while 3 percent of the flathead catfish fell into that category. The largest blue catfish measured 45.9 inches and tipped the scales at 42.3 pounds. The largest flathead measured 44.4 inches and weighed 40.7 pounds.

Overall, both blues and flatheads were most abundant in the lower reaches of the Wabash River; however, the proportion of quality-sized fish generally increased farther upstream.

Future DNR studies on catfish will address harvest rates, movement patterns and recruitment, which will allow biologists to better manage trophy catfish angling opportunities in Indiana, something that certainly won't hurt the whiskered one's place in the hearts and minds—and on the hooks—of its many admirers.

Fisheries biologist Dave Kittaka with a 40-inch, 31-pound flathead catfish from the lower Wabash River. (Photo by Steve Donabauer, 2007).

Assistant fisheries biologist Steve Donabauer with a 46-inch, 42-pound blue catfish from the lower Wabash River. (Photo by Tom Stefanavage, 2006).

Anglers' Legacy™
A national mission from  TAKE ME FISHING™

Have You Taken the Pledge?

Anglers' Legacy is a national program run by the Recreational Boating and Fishing Foundation that asks avid anglers to share their passion for fishing.

Of course, most anglers do this in one way or another—tell fish tales, take friends along on group outings—but Anglers' Legacy makes the program intentional. The aim is to form a concentrated effort to get those who have not fished before out on the water with someone who knows the ropes.

Here's how it works. As an avid Hoosier angler, go to AnglersLegacy.org and enter INDNR09 for the partner code, then follow through with your pledge, which is nothing more than a promise to take a one new person fishing that year. It's that easy to participate in this national program.

But why stop at one new person a year? The typical participant takes four new people a year fishing.

In its first year last year, the national program surpassed the 50,000-pledge milestone. This year, RBFF hopes to crack the 80,000 mark and is waiting for Indiana's fishing enthusiasts to band together again this year and do their part.

New this year is RBFF's "Fishington," a social networking site at TakeMeFishing.org/ community/home.

RBFF (rbff.org) is a nonprofit organization established in 1998 to increase participation in recreational angling and boating. RBFF helps people discover, share and protect the legacy of boating and fishing through national outreach programs.

Share your passion. Sign up.
AnglersLegacy.org

Catch a Memory

Finding a different way to make the most of a situation is making a difference for fishing on Indiana's larger bodies of public water. These waters are producing big fish to create big moments and memories for anglers.

These top predator fish are the product of special fishing management programs that lure in anglers to catch these line-busters. These fish offer a test of will, knowledge and persistence. Give these waters a chance to change your life, the fish await you.

Ramping Up for Angler Access

Lakes and streams full of fish don't do anglers much good if they can't get to them. That's where Indiana's Public Access program, which has built boat ramps all over the state, comes in.

The program was launched statewide in 1953 to provide free access to Indiana waters for anglers, boaters and hunters. It originally targeted natural lakes but has since expanded to include impoundments and streams, addressing the increasing demands for water-based recreation. Now, 56 years later, public support for the program is stronger than ever.

To date, the DNR Division of Fish and Wildlife has funded the acquisition and development of 375 public access sites, 215 in northern Indiana and 160 in the state's southern half. Those numbers include 115 sites on natural lakes, 91 on impoundments, 165 on rivers and four on Lake Michigan.

In 2008, four new ramps joined the family:

- **Meteer Lake:** Until this year, this small fishing lake in LaGrange County did not have an adequate or safe place from which users could access it. Anglers were launching boats at an unimproved access point along State Road 120 and parking along the side of the road. After the LaGrange County Parks Department acquired property on the west side of the lake and created Pine Knob Park, the DFW leased an area by the program center to fill the void.
- **Perkinsville:** This new site is several miles downstream from Anderson in Madison County, just upstream from State Road 13. It provides free public access to the West Fork of the White River. This stretch of the White provides abundant opportunities for good fishing, waterfowl hunting, canoeing, kayaking and bird-watching. Site acquisition and construction was funded with restoration funds resulting from settlement of the massive 1999 fish kill.
- **Irwin Park:** The Edinburgh Parks Department approached the DFW about providing access to the Big Blue River and offered to lease a site within the park.

Two canoeists take advantage of one of the 375 public access sites acquired and developed in Indiana over the past 56 years.

Since this stretch of the Big Blue River provides good fishing and there had been no previous boat access to it, demand should be high.

- **New Lake:** The City of Oakland City asked the DFW to consider improving access to New Lake, an 80-acre impoundment that serves as the city's secondary water supply. Although the DFW had been stocking channel catfish in it, the lake did not have adequate boat launch facilities. To make the project possible, the city agreed to lease an area on the southeast side of the lake that provided a secluded area away from the beach and other recreation activities in the park.

How Program Works

As these examples demonstrate, the DFW works in a variety of ways with local, state and federal agencies to make such access a reality. Land for access development is obtained primarily through donation, lease agreement or purchase from willing sellers at fair market value. Donation of lake or stream property, of course, is especially appreciated, both by the DFW and by anglers.

Funding for the public access program flows mostly from the sale of fishing and hunting licenses and from Sport Fish Restoration funds. The restoration funds are generated from federal excise taxes on fishing and boating equipment, a system that, year in and year out, has been the most effective user-pay, user-benefit program in the nation.

Where the Fish Are

Getting a boat in the water, of course, is only the beginning. You've got to know where to find the fish. You can do so by going to fishing.IN.gov and clicking on "Where to Fish Finder" near the bottom of the screen. This handy tool will guide you to information, maps and directions to various local, state and federal access sites, including those mentioned earlier.

Sounds as though you may have just lost your excuse for not trying new waters. Give it a try!

Note: If you are interested in donating or selling land to the DNR for boat-ramp access purposes, contact Ted Leverman, (260) 244-6805, tleverman@dnr.IN.gov.

Who Needs a Fishing License

To fish in public lakes, streams, rivers or tributaries in the state of Indiana or its boundary waters, you must have a valid fishing license. License holders must carry their license while fishing and present it to a conservation officer (or any authorized law enforcement official) upon request. There are fines and penalties for fishing without a license. You also must have a valid trout and salmon stamp in your possession to legally fish for or take trout and salmon from public waters.

These regulations only apply to fish that originate from, or are taken from, the public waters of Indiana. Fish from public waters that migrate into or from private waters are still covered by these regulations. These regulations do not apply to fish in private waters that did not originate from public waters.

A fishing license may be revoked if the license holder is convicted of violating fish-and-wildlife regulations. Any equipment, appliances and apparatus used in the violation of Indiana fish-and-wildlife laws may be seized for evidence and, upon conviction, confiscated.

A resident is a person who has lived in Indiana continuously for a period of 60 days preceding the date of license or permit purchase. All others are non-residents.

Game bird, waterfowl, or trout/salmon stamp privileges purchased through the Indiana Outdoor Web site must have an original signature, in ink, on the license on which the stamp privilege is listed. You do not need a traditional stamp in addition to the purchase of this stamp privilege. Traditional game bird, waterfowl, or trout/salmon stamps will still be available for purchase separately as a commemorative issue. Commemorative stamps do not convey hunting or fishing privileges and are available through the DNR Customer

Service Center in the Indiana Government Center South, 402 W. Washington St., Room W160, Indianapolis, IN 46204.

License Exemptions

A fishing license and trout and salmon stamp are NOT required for:

- Indiana residents born before April 1, 1943. However, such residents should carry their driver's license or other identification to verify age and residency.
- Resident and non-resident anglers under age 17.
- Residents who are legally blind.
- Residents of a state-owned mental rehabilitation facility.
- Residents of any licensed health care facility in Indiana taking part in a supervised

fishing activity sponsored by the facility.

- Fishing a private pond does not require a license; however, an angler must have permission from the property owner to fish.
- Residents of Indiana who are engaged in full-time military service may fish without a license while on approved military leave; however, the angler must carry leave orders and a valid Indiana driver's license or voter registration card.
- Non-resident military personnel stationed within Indiana must obtain a resident license to fish or hunt in Indiana.
- Landowners or lessees of farmland, who farm that land, their spouses and children living with them, while fishing in public waters from the farmland they own or lease.
- Some non-resident landowners, while fishing in public waters from the farmland

they own, according to the exemptions that their state provides to Indiana residents. See fishing.IN.gov or call (317) 233-4976 for specific information.

Buying a License

Online

To purchase resident and non-resident licenses online—24 hours a day, seven days a week—go to: **IndianaOutdoor.IN.gov**.

In Person

Bait shops, retailers and DNR offices across the state have computer stations to sell Indiana resident and non-resident hunting, fishing and trapping licenses and stamp privileges. For a list of these retailers and more information about the system, go to **IndianaOutdoor.IN.gov**.

Licenses are also available at the DNR Customer Service Center located in the Indiana Government Center South, Room W160, 402 W. Washington St., Indianapolis. Hours are 8:30 a.m. to 4:30 p.m., Monday-Friday.

By Phone

To purchase licenses by phone, or for more information, call the Indiana DNR Customer Service Center at (317) 232-4200. Please allow 2 weeks for delivery.

All licenses issued by the DNR are non-transferable and non-refundable.

By Mail

Send your order with the following information:

- Name, date of birth (All variety of hunting license requests should include Hunter Education certification number and state of certification, if born after Dec. 31, 1986.)
- Complete address, city, state, ZIP, phone number
- Height, weight, sex, color of hair and color of eyes
- Social security or Indiana driver's license number is mandatory
- Specify the licenses that you need and dates for one-day or multi-day licenses

Send check, money order or credit card number (Visa or MasterCard only) for licenses, made payable to Indiana DNR to: Licenses, DNR Customer Service Center, 402 W. Washington St., Rm. W160, Indianapolis, IN 46204.

Indiana disabled American veterans can get a DAV fishing and hunting license application form from the County Service

Officer or download the application form at fishing.IN.gov. Mail the form with a stamped self-addressed envelope to the DNR Customer Service Center.

Boating and Life Preservers

All motorboats used in public waters must be registered. For a copy of Indiana boating laws, write to DNR Division of Law Enforcement, 402 W. Washington St., Room W255D, Indianapolis, IN 46204.

A U.S. Coast Guard approved Type 1, 2, 3 or 5 wearable personal floatation device is required for each person in any boat. Boats 16 feet and longer, except for canoes or kayaks, must also have one USCG-approved throwable PFD on board. **Lake Michigan, the Ohio River and boundary waters of the Wabash River have special regulations.** Call the USCG at (219) 879-8371 for Lake Michigan, (502) 779-5400 for southern Indiana or see uscgboating.org for a copy of federal boating regulations.

On state-owned, leased or licensed lakes smaller than 300 acres, only electric motors may be used. No more than two 12-volt batteries can be used to power trolling motors on these waters.

Closed Seasons/ Closed Areas

There is no closed season for bass in Indiana.

Inland trout seasons and closures are listed on page 16. Lake Michigan and its tributary closures are listed on page 17. See page 19 for Ohio River paddlefish closures.

All other waters and fish species have no closed season.

Sinkers

You may want to consider using fishing sinkers that do not contain lead if you are concerned about your exposure to lead. Alternatives to lead sinkers are made out of steel, bismuth, tungsten and resin. Fish or wildlife health may be affected if they ingest lead or zinc sinkers.

Measuring Fish

To determine the accurate length of a fish, measure a straight line from the tip of the jaw (mouth closed) to the tip of the compressed tail fin. Measure with mouth closed and tail compressed to determine total length.

Measure shovelnose sturgeon from nose to fork in tail fin to determine length.

Tagging and Marking

Anyone interested in marking or tagging fish in public water must get approval from the Division of Fish and Wildlife (DFW) before marking or tagging occurs. An application, available from the DFW, must be processed 21 days before the scheduled

How to measure your fish

Total Length

Fork Length

start date. Contact the DFW for more information: (317) 232-4080.

Lake Webster Muskies

During the past three decades, Lake Webster has developed into one of the Midwest's premier muskie fisheries. Since 1998, it also has provided brood fish for muskie stocking in other Indiana lakes. Beginning in 2005 and each year since, muskies captured for brood stock were marked with a Passive Integrated Transponder (PIT) tag, that, when scanned with a specially designed reader, displays a unique identification number for each fish. The PIT tag is embedded within the muscle of the fish, behind the dorsal fin. This coding allows biologists to track the age and growth of muskies over time and estimate the number of adult muskies in the lake. Throughout the four years of this study, more than 1,100 Lake Webster muskies have been tagged. These tags cannot be seen externally; they're about the size of a hyphen (-), and are located internally, in the head of the fish, and pose no health threat if accidentally ingested.

Enlarged view of PIT tags.

Lake Monroe Walleye Study

A walleye telemetry project initiated in 2008 on Monroe Lake will continue through 2009. The purpose of this study is to track the seasonal movements of these fish. More information on this project is at fishing.IN.gov under "Overview." Currently, about 24 fish are tagged with transmitters and anchor tags. The radio antenna extends beyond the fish's abdomen by several inches. Yellow anchor tags also were placed in the fish's back on the left side of the dorsal fin. If you catch one of these fish and do not wish to release it, please return the transmitter to Avoca State Fish Hatchery (812) 279-1215. We encourage

release of these fish throughout 2009 to help us maintain the integrity of the fish tracking study.

Lake Michigan Trout and Salmon

Trout or salmon with a missing adipose fin contain a very small micro wire tag in the head of the fish with important information the DNR needs for a study. Please save the head from your marked (adipose fin-clipped) trout and salmon and contact the Division of Fish and Wildlife (219) 874-6824 for instruction on drop-off locations. Only trout and salmon with a missing adipose fin have micro tags.

Sport Fish Possession

The possession limit on all sport fish and frogs is two days' daily bag limit. Special possession and bag limits apply for trout and salmon on Lake Michigan (see page 17).

Channel Catfish Bag Limits

There is no bag limit on catfish taken from streams and no bag limit on channel catfish taken from Gibson Lake (Gibson County) or Turtle Creek Reservoir (Sullivan County). In all other lakes and reservoirs, the bag limit is 10 fish for any combination of flathead, blue or channel catfish.

Walleye Size Limits

Walleye and hybrid walleye taken from all waters in Indiana must be 14 inches in length or longer, except on the Ohio River where there are no minimum size limits.

The St. Joseph River has a special size limit. In cooperation with the State of Michigan, a 15-inch minimum size limit has been established for walleye and hybrid walleye taken from the St. Joseph River (St. Joseph and Elkhart counties).

Illegal Devices

It is illegal to use the following devices to take fish from public waters: a weir, electric current, dynamite or other explosive, a firearm, a crossbow, hands alone, or any substance that may weaken or poison fish. Cast nets cannot be used to catch sport fish.

Sorting Fish

Anglers are responsible for maintaining fish in a healthy condition if they wish to return fish to the water. Dead and dying fish already kept cannot be released back into the water. However, sorting of fish may be allowed within the bag limit if fish are in healthy condition at the time of release. Fish must be released into the water from which they were taken and be able to swim away normally. At no time may anglers have more than a bag limit of fish in their possession while engaged in a day's fishing. All fish in possession must meet legal size limits. For example, if you catch five largemouth bass (daily bag limit is five) and later that day catch a larger largemouth bass, it is legal to release any of the other fish in good condition in order to keep the larger one.

Baitfish, Crayfish

Minnows and crayfish may be collected any time through the year if you possess a valid sport fishing license. You must have a bait dealer's license to sell minnows and crayfish or possess more than 500 minnows or crayfish. You cannot transport more than 100 crayfish across the state boundary in a 24-hour period unless you are commercially raising crayfish. You may use artificial lighting to take crayfish.

If you plan to catch your own minnows or crayfish, the following restrictions apply. See page 19 for special regulations for collecting minnows and crayfish on the Ohio River.

- Seines cannot be larger than 12 feet in length and 4 feet deep with mesh no larger than ½ inch stretch.
- Minnow dip nets cannot exceed 3 feet square, without sides or walls, and may not have mesh larger than ½ inch stretch.
- Minnow traps cannot exceed 24 inches in length, with the opening of the trap no larger than 1 inch in diameter.
- Cast nets may be used, provided the net is no larger than 10 feet in diameter and the mesh stretch is no larger than ¾ inch.

You may use wild fish as live bait as long as the fish was caught legally and meets any size, catch, or possession limits established for that species. Goldfish may be used as live bait. Carp and gizzard shad cannot be used as live bait, except at Brookville Lake, where live shad may be used.

All minnows purchased from bait shops or taken from public waters cannot be of any species considered threatened or endangered, and may not be live prohibited species (pages 14, 23). Anglers collecting wild-caught minnows are encouraged to collect their bait from the water in which they will fish in order to prevent the spread of invasive species.

Minnows should not be released into the water after you finish fishing. Emptying bait buckets can contaminate a body of water with undesirable fish. In addition, bait and bait buckets exposed to lake or stream water could get contaminated with zebra mussel larvae, fish pathogens or other aquatic invasive species. Anglers are encouraged to dispense of baitfish in the trash after each outing and buy new bait for the next outing. Fishing worms should be discarded in trash containers.

Illegal Stocking, Aquarium Release

No individual may take any live fish (native or non-native) and release it into any other public waters without a stocking permit. Fisheries biologists in the DNR approve stocking of fish only after careful consideration of the potential impacts of new fish on the existing habitat and fish population.

Hooks for Hand or Pole Fishing

You may fish with no more than three poles or hand lines at any one time. Each line may have no more than two single or multi-barbed hooks, two artificial baits or two harnesses for live bait.

Single- or multi-barbed hooks may be used for hand or pole lines, float or jug fishing, limb, drop or trot lines. Special hook size and barb regulations apply to Lake Michigan and its tributaries. Refer to page 17 for hook information for these waters.

Gaffs, Grab Hooks and Landing Nets

Landing nets, gaff hooks or grab hooks may be used only to assist in the landing of a legally caught fish. They may not be used as the method of catching fish.

Indiana's Statewide Size and Bag Limits

SPECIES	DAILY BAG LIMIT	MINIMUM SIZE
bluegill ³	None ³	None
redear sunfish ³	25 ³	None
black bass (in lakes) ²	5 singly or in aggregate ¹	14 inches (exceptions: page 18)
black bass (in rivers) ²		12 inches (exceptions: page 18)
black bass (in Lake Michigan) ²	3 singly or in aggregate ¹	14 inches
yellow bass	None	None
white bass, hybrid striped bass	12 singly or in aggregate ¹ , no more than two fish may exceed 17 inches	None
striped bass	2	None
rock bass	25	None
crappie ³	25 ³	None
walleye, walleye-sauger hybrid	6 singly or in aggregate ¹	14 inches (exceptions: page 12)
sauger		None
muskellunge and tiger muskellunge	1 singly	36 inches
northern pike	3	20 inches
yellow perch	None (15 on Lake Michigan only)	None
catfish: channel, blue, flathead (in streams)	None	10 inches
catfish: channel, blue, flathead (in lakes, reservoirs)	10	None
bullhead	None	None
shovelnose sturgeon	None	25 inches (fork length)

¹ Singly or in aggregate means that the daily bag limit includes any combination of the species.

² Black bass includes largemouth, smallmouth and spotted bass.

³ Daily bag limit for sunfish at J.C. Murphey Lake (Newton Co.) is 25 singly or in aggregate.

Snares

You may use no more than one snare to take suckers, carp, gar and bowfin. Snaring these fish may be done only between sunrise and sunset.

Limb Lines

A limb line (or drop line) involves suspending a fishing line from a limb extending beyond the bank of a body of water. You may fish with no more than 10 limb or drop lines at any one time. Each line may have no more than one single- or multi-barbed hook attached to it. Each line must have a readable tag showing the name and address of the user. All lines must be checked at least once every 24 hours. It is illegal to use a limb or drop line within 300 yards of any partial or full dam structure on any stream, river, ditch, canal or reservoir.

Snagging Fish

It is illegal to snag fish from public waters in Indiana, including the Ohio River. Foul-hooked fish (fish not caught in the mouth) must be released to the water and not kept. Snagging is the practice of dragging or jerking a hook (or hooks), baited or unbaited, through the water with the intention of snagging a fish on contact.

Trot Lines

A trot line (also called a set line or throw line) is a fishing line with smaller lines attached to it extending out into the water from a fixed point, such as a boat dock or tree. You may fish with no more than one trot line at any one time. The trot line must have no more than 50 single- or multi-barbed hooks. Each drop line on a trot line may have only one hook. Trot lines must

bear a readable tag clearly showing the name and address of the user, and be checked at least once every 24 hours. It is illegal to use a trot line in Lake Michigan or within 300 yards of any partial or full dam structure on any stream, river, ditch, canal or reservoir.

Float Fishing

Float or jug fishing is the use of any buoyed container (made of any material other than glass) that suspends a single fishing line and a single- or multi-barbed hook.

As many as five floats may be used, but only one hook may be attached to each float line. Each float must be marked with the user's name and address, and all lines must be in constant visual contact. Float fishing is not allowed on lakes and reservoirs for public safety reasons.

Ice Fishing

When ice fishing, no more than three lines may be used at any one time. Each line may contain no more than two hooks (single, double or treble) or two artificial baits. Holes cut for ice fishing cannot be more than 12 inches in diameter. Tip-ups must be identified with the name and address of the user, and must be in constant visual contact of the person using them.

Ice fishing shelters must have the owner's name and address in 3-inch block letters on the outside of the door. An unattended portable ice fishing shelter must have the owner's name and address in 3-inch block letters on an exterior wall. Any ice fishing shelter or portable shelter left unattended, between sunset and sunrise, must have at least one red reflector or a 3-inch by 3-inch reflective strip on each side of the structure.

Ice shanties and portable shelters must be removed from public waters before ice-out. If used before Jan. 1 and after Feb. 15, all structures must be removed daily.

Spear Fishing

Suckers, carp, gar, bowfin, buffalo and shad may be taken at the locations below with the equipment listed, and only during the hours noted. There are no bag limits for these fish. See page 17 for restrictions on Lake Michigan tributaries.

Large Streams (1,500 cfs minimum flow)

- White River from the Wabash River

upstream to the junction of East and West forks

- West Fork of White River, upstream to the dam below Harding Street in Indianapolis
- East Fork of White River, upstream to the dam at the south edge of Columbus
- The Wabash River, upstream to S.R. 13 at the town of Wabash
- The Tippecanoe River, upstream to ½ mile below its confluence with Big Creek
- The Maumee River, upstream to the Anthony Blvd. Bridge in Fort Wayne
- The Kankakee River, upstream to S.R. 55 bridge
- The St. Joseph River (upstream from Twin Branch dam) in St. Joseph and Elkhart counties

Equipment: Fish spear, gig, spear gun, bow and arrow, underwater spear. Crossbows may not be used.

Time: All year, day or night.

Small Streams (less than 1,500 cfs flow)

Any and all streams or partial streams not listed above.

Equipment: Bow and arrow only. Crossbows may not be used.

Time: All year, sunrise to sunset.

Non-flowing Waters (including lakes, ponds and reservoirs)

Equipment: Fish spear, gig, spear gun, underwater spear, and bow and arrow. Crossbows may not be used.

Time: All year, day or night.

Smelt Fishing

Smelt may be taken from Lake Michigan and Oliver Lake in LaGrange County from March 1 through May 30. Smelt may be taken only with a single seine or net. The seine or net may not exceed 12 feet in length and 6 feet in depth nor have a stretch mesh larger than 1½ inches. A dip net may not exceed 12 feet in diameter.

Wanton Waste

The intentional waste and destruction of fish is prohibited unless the fish is required by law to be killed. Fish must not be mutilated and returned to the water unless the fish is lawfully used as bait. Fish parts, including entrails, must not be discarded into any state waters, but should be disposed of in a sanitary manner that does not pollute the water or become detrimental to public health or comfort.

Sale of Aquatic Life

No fish, frogs, turtles or other reptile or amphibian taken under a fishing or hunting license may be bought, sold or bartered. You may keep fish that you catch for an aquarium if that fish meets legal size and bag limit requirements. If you give your catch away, it's a good idea to provide the recipient a note identifying the fish you gave them. This avoids confusion with exceeding the daily bag limit or possessing fish without a fishing license.

Mussels

It is illegal to collect or take live or dead mussel shells from public waters. A ban on harvesting shells has been in effect since 1991 to protect against a rapid decrease in the abundance and distribution of mussels. Please do not disturb living mussels or take dead shells. It is illegal to possess live the following aquatic invasive mussels: Asiatic clam, quagga mussel and zebra mussel.

Endangered Fish

The following fish species are classified as endangered in Indiana:

- bantam sunfish
- lake sturgeon (page 15)
- cavefishes
- northern brook lamprey
- channel darter
- pallid shiner
- gilt darter
- reddsides
- greater redhorse
- variegated darter

It is illegal to take or possess these fish at any time. Most of these species are small and would not be caught while angling. However, these species could be encountered during baitfish collection. If captured, immediately return them unharmed to the water in which they were found. A listing of Indiana's endangered species is available at fishing.IN.gov.

STATE FAIR FISHIN' POND VOLUNTEERS NEEDED!

Share your passion with a new generation of anglers. Volunteer at the DNR's State Fair Fishing Pond. Volunteer by e-mailing gofishin@dnr.in.gov.

Reptiles and Amphibians

All reptiles and amphibians native to Indiana are protected by law. Box turtles cannot be collected from the wild at any time. Species of frogs, lizards, salamanders, snakes, toads or turtles on the state or federal endangered species list may not be collected from the wild at any time. Species specified as game animals (see table below to the right) may be collected from the wild with a hunting or fishing license. License holders must obey season dates, bag limits and use legal trapping methods. An individual with a valid hunting or fishing license may take game frog and turtle species from Fish and Wildlife areas where hunting or fishing is authorized. Non-game reptiles and amphibians may not be taken from any DNR property without a scientific purposes license. For a list of Indiana's native species go to: fishing.IN.gov. The possession limit

Reptiles/Amphibians Seasons and Limits

SPECIES	SEASON	DAILY BAG LIMIT	POSSESSION LIMIT	RESTRICTIONS
Game turtles · common snapping turtle · smooth softshell turtle · spiny softshell turtle	year-round	25*	50*	Turtle traps may be used but may not have an opening below the water surface.
Game frogs · bull frog · green frog	June 15- Apr. 30	25*	50*	Frogs may be taken with gig or spear with a head not more than 3 inches in width and a single row of tines, long bow and arrow, club, hands alone or pole or hand line with not more than one hook or artificial lure attached. Firearms used for frog hunting are restricted to a .22-caliber firearm loaded with bird shot only.

* Singly or in aggregate, which means the catch limit includes any combination of the species.

for non-endangered non-game species is four, with the exception of the Eastern box turtle. Collected species may not be sold. Indiana residents over age 17 must have a valid hunting or fishing license in possession while collecting species of reptiles and amphibians from the wild. All non-resident

adults and most non-resident youth must possess a non-resident annual hunting license. Legally collected amphibians or reptiles kept in captivity less than 30 days may be released only at their original capture site if they have never been housed with another animal.

Lake Sturgeon - Endangered Species

- Mouth:** (A) Upper lip without lobes, lower lip with two lobes.
- Snout:** (B) Cone-shaped, rounded.
- Tail:** (C) Rounded, thick caudal peduncle not fully scaled; smooth areas between rows of bony plates.
- Size:** Adults normally caught at 45-55 inches and 25-45 lbs.; can reach lengths greater than 6 feet and weights over 100 lbs.
- Range:** Lower Wabash and White rivers and Lake Michigan, possibly in other large lakes or rivers.

*Lake sturgeon: may have small metal tag with number on base of dorsal fin.

- Mouth:** (A) Upper lip with four lobes, lower lip with four lobes.
- Snout:** (B) Shovel-shaped, flattened.
- Tail:** (C) Long, thin caudal peduncle fully scaled with bony plates.
- Size:** Adults normally caught at 30-40 inches and 3-7 lbs., rarely larger.
- Range:** Wabash and White rivers and occasionally in other large rivers.

**Shovelnose sturgeon: long filament usually not present on the.

Inland Trout

Lakes: No closed season for taking trout from inland lakes except March 15 to April 1 for:

- Island Lake on Minnehaha FWA, Sullivan County
- Little George Lake on Chinook FWA, Clay County
- Greene-Sullivan State Forest

Streams: The opening day of trout season for inland streams, other than Lake Michigan tributaries, is the last Saturday in April. The starting time is 6 a.m. local time.

Catch-and-release applies to all trout streams from January 1 through April 14. See page 17 for special tributary restrictions and closure information for Lake Michigan streams.

A closed season for selected trout streams (see below) runs from April 15 to the last Saturday in April (opening day), when the hatcheries complete the annual trout stockings.

- Pigeon River and Pigeon Creek in LaGrange County from the Steuben County line to C.R. 410 E (Troxel's Bridge). This does not include the impoundment known as Mongo Mill Pond.
- Harding Run, Curtis Creek, Bloody Run and Graveyard Run (tributaries of Pigeon River) in LaGrange County.
- Turkey Creek north of C.R. 100 S in LaGrange County

Inland Trout Sizes and Limits

SPECIES	DAILY BAG LIMIT	MINIMUM SIZE
brook trout	5 singly or in aggregate for all trout.	7 inches*
rainbow trout	No more than 3 may be lake trout.	
lake trout	No more than 1 may be brown trout.	
brown trout*		
*18" minimum size limit at Oliver, Olin and Martin lakes in LaGrange Co., and Brookville Lake tailwater in Franklin Co.		

- Rainbow Pit located on Pigeon River FWA, approximately one mile east of Ontario in LaGrange County.
- Little Elkhart River and Rowe-Eden Ditch in LaGrange County
- Solomon Creek and Cobus Creek in Elkhart County
- Little Kankakee River in LaPorte County from C.R. 800 E upstream to Division Road
- Spy Run within Franke Park in Allen County
- Mississinewa River within the boundaries of the Randolph County Wildlife Management Area

- Big Blue River within the boundaries of Wilbur Wright FWA in Henry County
- Jackson Creek upstream of Yellowwood Lake in Brown County

Three trout streams in Elkhart County (totaling 2.8 miles) are designated as year-round "catch-and-release only" and "artificial-lures-or-flies only" trout fishing areas.

Only artificial lures and artificial flies can be used on the following catch-and-release waters in Elkhart County:

- Little Elkhart River from C.R. 43 downstream to C.R. 16, except for waters along Riverbend Park from C.R. 16 upstream to the pedestrian footbridge.
- Solomon Creek from C.R. 33 downstream to the Elkhart River
- Cobus Creek from Old U.S. 20 downstream to the St. Joseph River

Brown Trout Minimum Size Limit Waters:

An 18" minimum size limit exists at Oliver, Olin, and Martin Lakes in LaGrange Co., and the Brookville Lake tailwater in Franklin County.

for more information

Lake Michigan and Tributaries: Sizes and Limits

- You cannot possess more than five trout or salmon (no more than two may be lake trout) or more than 15 yellow perch while fishing on Indiana's portion of Lake Michigan—even if you have a fishing license from a neighboring state.
- You can take sucker, carp, gar, bowfin, buffalo and shad from Lake Michigan with a bow and arrow.
- You cannot use a trot line (power line), set line or throw line to take fish from Lake Michigan.
- Fishing is not allowed within 100 feet above or below the Praxair Dam on the East Branch of the Little Calumet River.
- See page 18 for Lake Michigan bass regulations.

Tributary Restrictions

You may not possess a fish spear, gig, gaff, bowfishing equipment, crossbow, grab hook, spear gun, club, snag hook or underwater spear in, or adjacent to the Galena River (LaPorte Co.), Trail Creek (LaPorte Co.), the East Branch of the Little Calumet River (LaPorte and Porter counties), Salt Creek (Porter Co.), the West Branch of the Little Calumet River (Lake and Porter counties), Burns Ditch (Lake and Porter counties), Deep River downstream from the dam at

Lake Michigan and Tributaries Sizes and Limits

SPECIES	DAILY BAG LIMIT	MINIMUM SIZE
chinook salmon	5 total salmon and trout	14 inches
coho salmon	No more than 2 may be lake trout.	Lake Michigan, streams, and St. Joseph River
Atlantic salmon		
pink salmon		
brown trout		
steelhead trout		
lake trout		
yellow perch	15 on Lake Michigan only	None

Camp 133 (Lake Co.) or the tributaries to these waterways.

Tributary Closings

While there is no closed season for taking trout and salmon from Lake Michigan, certain tributary streams are closed to all fishing from April 1 through June 15. These streams are stocked annually with trout and salmon. The closed fishing period allows these small, vulnerable fish to migrate safely downstream to Lake Michigan. The closed season applies to:

- The East Branch of Little Calumet River in Porter County from U.S. 12 upstream to U.S. 20.
- Trail Creek in LaPorte County from the Franklin Street Bridge in Michigan City upstream to U.S. 35.

Hook Restrictions

In the waters including Lake Michigan tributaries, the St. Joseph River and its tributary streams from the Twin Branch Dam downstream to the Michigan state line (St. Joseph County), you may not fish with more than one single hook per line or one artificial bait or harness for use with live bait.

Single hooks, including those on artificial baits, cannot exceed ½ inch from point to shank. Double and treble hooks are only allowed on artificial baits and shall not exceed ¾ inch from point to shank.

Single hook
½ inch or less
from point to
shank

Double or treble hook
¾ inch or less
from point to
shank

St. Joseph River

Special regulations apply to fishing the St. Joseph River and its tributaries from Twin Branch Dam in Mishawaka, downstream to the Michigan state line. These include:

- Minimum size for trout and salmon is 14 inches.
- No fishing is allowed at any time in the East Race Waterway in South Bend. No fishing is allowed within 100 feet of the entrance and exit of the East Race.
- No fishing is allowed at any time from the fish ladders located on the South Bend or Mishawaka Central Park dams.
- No fishing is allowed within 100 feet of the entrances and exits of the fish ladders.
- No fishing is allowed by boat or other watercraft in the St. Joseph River below the South Bend Dam for a distance of 200 feet, and from the Mishawaka Central Park Dam downstream to the Main Street bridge, Mishawaka.

Any fish taken from the Lake Michigan tributaries defined in this section must be hooked in the mouth. Foul-hooked fish must be returned to the water.

FREE FISHING WEEKEND June 6-7, 2009

Indiana residents can enjoy a weekend of fishing without purchasing a license.

This year, take a friend along and introduce them to a new activity that that could become a lifelong passion.

(All other rules and regulations are enforced.)

Statewide Black Bass Regulations

TYPE OF WATER	DAILY BAG LIMIT	MINIMUM SIZE
Lakes	5 singly or in aggregate	14 inches
Rivers/Streams	5 singly or in aggregate	12 inches
Lake Michigan	3 singly or in aggregate	14 inches

*Certain waters have special bag limits and minimum size limits that apply to largemouth bass. See information on this page.

Special Largemouth Bass Lake Regulations

Special largemouth bass regulations are in effect for many Indiana waters. The expected benefits of size limits are an increase in the number of bass caught (although many must be released); an increase in size of bass; and in some cases, improvement in bluegill size and increased predation on abundant prey like gizzard shad.

Regulations on bass fishing differ for the Ohio River. See page 19.

Lake Limits (county)

15-inch minimum size limit

- Patoka Lake (Orange, Dubois and Crawford)
- Dogwood Lake (Davies)

16-inch minimum size limit

- Cecil M. Harden Lake (Parke)

18-inch minimum size limits

There is a daily bag limit of two bass for these waters:

- Ball Lake (Steuben)
- Blue Grass, Loon Lake (Warrick)
- Gibson Lake (Gibson)
- J.C. Murphey Lake (Newton)
- Robinson Lake (Whitley and Kosciusko)
- Tri-County FWA-all lakes

20-inch minimum size limit and one fish daily bag limit

- Turtle Creek Reservoir (Sullivan)

12- to 15-inch slot size limits

No largemouth bass between 12 and 15 inches in length may be taken from the following:

- Buffalo Trace Lake (Harrison)
- Celina Lake (Perry)
- Ferdinand State Forest Lake (Dubois)
- Indian Lake (Perry)
- Montgomery City Park Lake (Davies)
- Saddle Lake (Perry)
- Scales Lake (Warrick)
- Shakamak State Park lakes (Clay, Greene and Sullivan)
- Tipsaw Lake (Perry)

No-minimum-size-limit waters

No size limits for largemouth bass are in effect for:

- Brownstown State Fishing Area (Jackson)
- Burdette Park lakes (Vanderburgh)
- Chandler Town Lake (Warrick)
- Cypress Lake State Fishing Area (Jackson)
- Deming Park lakes (Vigo)
- Garvin Park Lake (Vanderburgh)
- Glen Miller Pond (Wayne)
- Hayswood Lake (Harrison)
- Henry County Memorial Park Lake (Henry)
- Hovey Lake at Hovey Lake FWA (Posey)
- Krannert Lake (Marion)

Anglers like these two men need to be aware of special regulations on size and bag limits that apply to fishing for largemouth bass on certain Indiana waters.

- Lake Sullivan (Marion)
- Ruster Lake (Marion)
- Schnebelt Pond (Dearborn)

Special Stream Black Bass Regulations

20-inch minimum size limit and one fish daily bag limit

- Sugar Creek (Montgomery, Parke, Boone, Clinton and Tipton)

12- to 15-inch slot limit with no more than two black bass larger than 15 inches

- Blue River (Crawford, Harrison and Washington)

- Always wet your hands before touching the fish.
- Handle the fish gently and quickly. Keep it in the water as much as possible. Do not put your fingers in the gill slits or in the eye sockets. Do not squeeze the fish or cause the loss of scales.
- Remove the hook carefully. If the hook cannot be removed easily, cut the line or leader and leave the hook in the fish. Eventually, the hook will dissolve. Artificial lures are recommended because they usually hook the fish in the

lip area, the easiest place to remove the hook.

- Gently hold the fish in the water and move it back and forth until it begins to swim away.
- Remember to land and release your fish as quickly as possible.
- Never release live bait into a fishing area. Never move fish from one water to another. Stocking fish into public water requires a permit. The release of an undesirable or exotic species can contaminate a body of water.

Sport Fishing on the Ohio

These regulations are the result of a cooperative effort by Indiana and five other Ohio River states. In many cases, these rules differ significantly from other laws and regulations in Indiana. These rules and regulations apply only to the main stem of the Ohio River and do not include any tributaries or embayments, where general Indiana fishing regulations apply.

A person holding an Indiana fishing license (resident or non-resident), or who is exempt from having a license in Indiana, may fish from either bank of the Ohio River, or any part of the main stem of the Ohio River, by boat. The interstate reciprocal license agreement with Kentucky does not apply to tributaries of the Ohio River in either state. To fish the tributaries you must obtain a license from that state.

While fishing for sport fish, you may use poles or hand lines, float-fishing methods, set lines with one single- or multi-barbed hook, or up to two trot lines with no more than 50 single- or multi-barbed hooks per line. These lines must be spaced at least 18 inches apart. Trot lines must be checked at least once every 24 hours. Snagging is now prohibited as a sport fishing method on the Ohio River.

Ohio River Sport Fish

- largemouth bass
- yellow bass
- trout
- smallmouth bass
- black crappie
- tiger muskellunge
- spotted bass
- white crappie
- northern pike
- hybrid striped bass
- sauger
- muskellunge
- rock bass
- walleye
- chain pickerel
- striped bass
- saugeye

Paddlefish

Paddlefish may not be taken from any portion of the Indiana waters of the Ohio River. It is illegal to take paddlefish from any waters of Indiana on a sport fishing license.

Other Fish

All other fish, except those classified as threatened or endangered, may be taken with the same sport fishing methods described above as well, as with the following methods:

- Long or compound bow with an arrow having one or more barbs and an attached

Ohio River: Daily, Possession and Size Limits

SPECIES	BAG LIMIT	POSSESSION LIMIT	MINIMUM SIZE
largemouth bass smallmouth bass spotted bass	6*	12*	12 inches No size limit on spotted bass
white bass yellow bass striped bass hybrid striped bass	30*	60*	No more than four fish may be 15 inches or longer
rock bass	15	30	None
crappie	30	60	None
muskellunge tiger muskellunge	2*	2*	30 inches
walleye sauger hybrid walleye (saugeye)	10*	20*	None

*Singly or in aggregate, which means the catch limit includes any combination of the species. For instance, your daily bag could include 30 white bass or 30 hybrid striped bass or any combination of the two species equalling no more than 30.

line. Catfish and paddlefish cannot be taken with bow and arrow during nighttime hours ½ hour after sunset until ½ hour before sunrise.) Crossbows are illegal.

- Gigging from Feb. 1 to May 10 with any pronged or barbed instrument attached to the end of a rigid object. You cannot take a fish by gigging from either a boat or platform.

Where to Fish on the Ohio

Much of the best fishing on the Ohio River is concentrated near dams. Access fees may be charged at some sites.

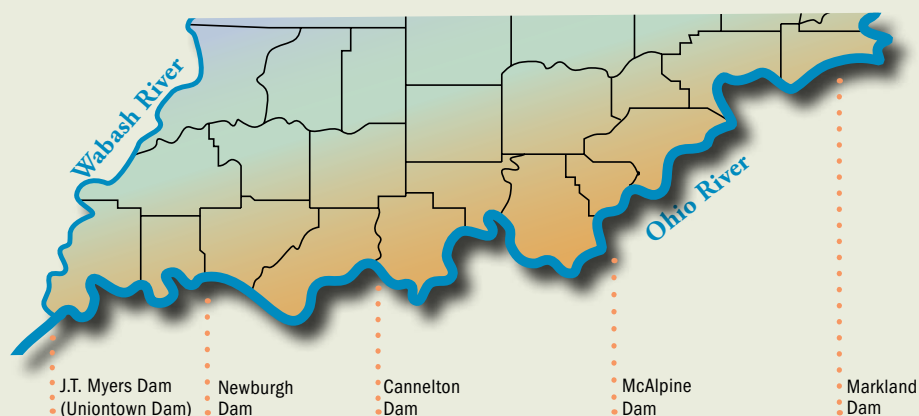

- J.T. Myers Dam (Uniontown Dam), 15 miles southwest of Mount Vernon in Posey County, accessible at Hovey Lake FWA.
- Newburgh Dam—in the town of Newburgh off of S.R. 66.
- Cannelton Dam—follow Taylor Street south from S.R. 66 in Cannelton.

- McAlpine Dam—located at Clarksville. Access at Falls of the Ohio State Park. Accessible boat ramp located at George Rogers Clark Homesite in Clarksville. Access at New Albany off of Water Street in Jaycee Riverfront Park.
- Markland Dam—near Markland in Switzerland County. Accessible at DamVue River Camp or Vevay boat ramp.

Minnows and Crayfish

You may take minnows or crayfish from the Ohio River by the following methods:

- A minnow trap not to exceed three feet long and 18 inches in diameter nor having a throat opening greater than one inch in diameter.
- A dip net no more than three feet in diameter.
- A minnow seine no more than 30 feet long and six feet deep nor having mesh size larger than ¼ inch bar mesh.
- A cast net not to exceed nine feet in diameter nor having mesh size larger than ⅜ inch bar mesh.

INDIANA FISH IDENTIFICATION GUIDE

Sunfish

bluegill 5 to 9 vertical bars on sides, black opercle flat (ear) with no margin, dark spot at rear of dorsal fin

redear opercle flap (ear) is tipped with red or orange margin

black crappie 7 to 8 dorsal spines, random blotches on sides

white crappie 6 dorsal spines, black side markings form vertical bars rather than random spots

Black Bass

largemouth bass upper jaw extends beyond back of eye

smallmouth bass upper jaw does not extend beyond back of eye

spotted bass red eye, horizontal lines of dark spots on lower sides, upper jaw does not extend beyond back of eye

True Bass

hybrid striped two tooth patches on back of tongue are joined, first stripe below lateral line

complete to tail, stripes above lateral line usually broken

white bass single tooth patch on back of tongue, first stripe below lateral line not complete to tail

striped bass tooth patches on back of tongue in two parallel patches, first stripe below lateral line complete to tail, stripes above lateral line are unbroken

Catfish

blue catfish 30 to 35 anal fin rays, anal fin margin is straight, caudal fin is deeply forked

bluegill

black crappie

hybrid striped bass

redear

white crappie

white bass

largemouth bass

striped bass

smallmouth bass

blue catfish

spotted bass

It's Simple ... Anglers, Boaters Can Stop the Spread of Aquatic Invasive Species

To preserve the waters they enjoy and to allow future generations to do the same, anglers need to do a better job of preventing the spread of aquatic invasive species, called AIS.

Last year, a survey of Indiana's licensed anglers showed the culprit to be a lack of knowledge, both of AIS themselves and of the steps one should take to prevent their spread.

The results showed that most respondents had little knowledge about the AIS that plague the state's waters.

While many anglers reported that they routinely take a few important steps to prevent the spread of AIS, few do all that is necessary.

Lack of knowledge of the proper precautions for preventing the spread of AIS was the most common response anglers gave about why they do not take such precautions.

Many anglers also said that they did not perform prevention steps because they did not think the bodies of water they use are infested with invasive species.

All aquatic users should assume that each body of water is infested with AIS and should therefore take proper prevention steps after visiting each body of water.

The reason is that many AIS populations take a number of years to build to a level of detection. If users wait for AIS confirmation, these species will spread as they have in the past.

Boaters and anglers can help prevent the spread of AIS and pathogens by following a few simple steps.

STOP AQUATIC HITCHHIKERS!™

Prevent the transport of nuisance species.
Clean all recreational equipment.
www.ProtectYourWaters.net

When you leave a body of water:

- Remove any visible mud, plants, fish or animals before transporting equipment.
- Eliminate water from equipment before transporting.
- Clean and dry anything that comes into contact with water (boats, trailers, equipment, clothing, dogs, etc.).
- Never release plants, fish or animals into a body of water unless they came out of that body of water.

Anglers need to make a regular practice of removing all mud and vegetation from equipment and draining all water from a boat's bilge, livewells, bait buckets, and any other water-holding areas.

All equipment should dry for five days before being used in another body of water. If adequate drying time is not possible or conditions are not suitable for complete drying during that time period, a hot water wash (car wash) will kill hitchhiking organisms.

Fish caught from one body of water should never be released into another waterway since the fish could themselves be invasive or they could be harboring other invasives or pathogens.

Unused bait should be discarded in the trash rather than being transferred between waters. Anglers should instead buy fresh baitfish for the next outing.

Making these SIMPLE steps a habit will prevent the spread of AIS and protect Indiana's waters for generations to come. For information on AIS, see InvasiveSpecies.IN.gov. See the DNR video on Hydrilla, an invasive species, at IN.gov/dnr/12462.htm

Illegal Fish Stockings

No individual may take any live fish (wild or aquarium fish) and release it into any other public water without a fish stocking permit. Fisheries biologists in the DNR

approve fish stockings only after careful consideration of the potential impacts of the new fish on existing sport fishing activities and endangered species.

Species Illegal to Possess

It is illegal to possess the following fish and mussels alive without holding a special permit. If any of these are caught, they must be killed immediately and not returned to the water. Your cooperation is essential.

- Asiatic clam
- Snakeheads of the family Channidae
- Bighead carp
- Quagga mussel
- Black carp
- Tubenose goby
- Round goby
- Walking catfish of the family Clariidae
- Rudd
- White perch (not freshwater drum)
- Ruffe
- Zebra mussel
- Silver carp

Lake and Topo Maps

Improve your fishing success with lake depth contour maps.

DNR lake and topographical maps are inexpensive and easy to obtain. US Geological Survey Maps show land contours, water, structures and vegetation. Send your requests to: DNR Customer Service Center, 402 W. Washington St., W160, Indianapolis, IN 46204. Call (317) 232-4200 for more information.

Is it Safe to Eat Your Fish?

Bluegills can make a tasty—and healthy—meal.

Eating recreationally caught fish from Indiana waters can be a healthy and tasty activity when you have the proper information. The following section should alleviate most anglers' concerns about eating wild-caught fish.

It's all about a person's exposure to contaminants over time.

The two contaminants that drive the fish consumption advisory are mercury and polychlorinated biphenyls (PCBs). Both contaminants are generally persistent in the environment at very low levels where they do not pose a health risk from direct contact with the water; however, both contaminants accumulate in fish tissue. *The fish tissue contaminant amounts are not nearly high enough to make humans sick from just one meal or even several meals. If it was perceived that they were, there would be a ban on consuming fish, not just an advisory.*

The risk of eating contaminated fish manifests itself over time. The contaminants accumulate in human tissue like they do in fish and can build to levels that could pose a health threat. *The consumption advisory is based on a model that people are consuming 8 oz. of fish on 225 days each year over 70 years.* A determination can then be made from concentrations of contaminants in fish tested as to how frequently they can be safely eaten (note the fish consumption advisory groups). Most anglers do not eat wild-caught fish nearly this frequently. As a result, if they are aware of the contaminant levels that likely are in the fish they catch, and those fish fall within the recommended guidelines, they should have little concern about eating them.

The primary concern is with the at-risk population. This population comprises women of childbearing years, nursing mothers and children under age 15. The reason for extra concern is evidence of developmental problems in babies and young children

Fish Consumption Guidelines

Wild Fish Consumption Advisory Groups

Group	Adult Advisory	At-Risk population* Advisory
1	Unlimited consumption	1 meal per week
2	1 meal per week	1 meal per month
3	1 meal per month	Do not eat
4	1 meal every 2 months	Do not eat
5	Do not eat	Do not eat

*Women of childbearing years, nursing mothers, and children under age 15.

All Sampled State Lakes with Some Group 4 and 5 Species

Lake	County	Species	Size (inches)	Group
Center Lake	Kosciusko	Black Bullhead	14+	4
Hovey Lake	Posey	Channel Catfish	19+	4
		Smallmouth	19+	4
		Buffalo		
		White Bass	12+	4
J. Edward Roush Lake	Huntington	Channel Catfish	28+	4
Lake James	Steuben	Northern Pike	36+	4
Lake Shafer	White	River Carpsucker	17+	4
Marquette Lagoon	Lake	Bluegill	7+	4
Palestine Lake	Kosciusko	Largemouth Bass	15+	4
Sylvan Lake	Noble	Carp	28+	4
Wolf Lake	Lake	Largemouth Bass	17+	4
Lake Michigan	Lake	Black Crappie	8+	4
		Brown Trout	22+	4
		Carp	all	5
		Channel Catfish	all	5
		Chinook Salmon	32+	4
		Freshwater Drum	16+	4
		Lake Trout	23-27	4
		Lake Trout	27+	5
		Largemouth Bass	7+	4
		Northern Pike	14+	4
		Silver Redhorse	25+	5

from contaminants at levels lower than what can be safely eaten by adults. The advisory reflects this concern. There is added concern about this group eating commercial sources of fish. *Even though this group may not eat wild-caught fish alone frequently enough to be concerned, combining such consumption with frequently eaten fish from commercial sources containing contaminants could pose a health risk.* Note the commercial fish consumption table for the at-risk group and for people that frequently consume commercial fish.

Eating fish from lakes and reservoirs is generally less of a concern. Contaminant levels are generally very low in lakes and reservoirs (note major group 1 and 2 fishing waters table). Also note the table containing all of the sampled lakes and reservoirs in Indiana that had species of fish in groups 4 and 5.

Commercial Fish Consumption Advisory

Species	Adult Advisory	At-risk population* Advisory
Fresh or canned salmon; shellfish like shrimp, crab, and oysters; tilapia; herring; canned "light" tuna; scallops; sardines; pollock; cod; and catfish	Unlimited consumption	1 meal per week
Canned albacore "white" tuna (6 oz.), tuna steak, halibut, and lobster	1 meal per week	1 meal per month
Shark, swordfish, tile fish, king mackerel	1 meal per month	Do not eat

*Women of childbearing years, nursing mothers, and children under age 15. Contact the ISDH for more detailed information on the commercial fish consumption advisory.

Group 4 and 5 Sport Fish in Some Major Rivers*

River	County	Species	Size (inches)	Group
East Fork White River	Lawrence	Channel Catfish	15-21	4
		Channel Catfish	21+	5
		Flathead Catfish	16+	4
		Largemouth Bass	11-14	4
		Largemouth Bass	14+	5
Wabash River	Vigo/Sullivan/Knox	Striped Bass	22+	4
		Channel Catfish	22+	4
		Striped Bass	12+	4
West Fork White River	Hamilton/Marion from Stony Creek to Broad Ripple dam	Channel Catfish	All	5
Ohio River	All counties	Largemouth Bass	14+	4
		Carp	33+	4
		Channel Catfish	19-26	4
		Channel Catfish	26+	5
		Flathead Catfish	23+	5
		Hybrid Walleye	17+	4
		Smallmouth Bass	13-15	4
		Smallmouth Bass	15+	5
		White/Striped/Hybrid Bass	20+	4

*Consult the fish consumption advisory for a complete listing

Major Fishing Locations Where All Fish are Group 1 or 2*

Lake	County	*Exceptions to Group 1,2
Brookville Lake	Franklin, Union	largemouth bass 15+ in. (3)
Dogwood Lake	Daviess	
Eagle Creek Reservoir	Marion	
Flint Lake	Porter	
Harden Lake	Parke	
Lake James	Steuben	northern pike 20+ in. (3 and 4)
Lake Lemon	Monroe	flathead catfish 20+ in. (3)
Lake Wawasee	Kosciusko	bullhead 15+ in. (3)
Lake of the Woods	LaGrange	carp 22+ in. (3)
Monroe Lake	Brown/Monroe	
Morse Lake	Hamilton	
Patoka Lake	Dubois/Orange	
Salamonie Lake	Wabash	carp 23+ in. (3)
Starve Hollow Lake	Jackson	
Turtle Creek Lake	Sullivan	carp 26+ in. (3)
Worster Lake	St Joseph	brown bullhead 16+ in. (3)

All State Waters Carrying Do-Not-Eat Advisories for All Species

Water	County
Clear Creek	Monroe
Elliot Ditch	Tippecanoe
Grand Calumet River/Indiana Harbor Canal	Lake
Kokomo Creek	Howard - from U.S. 31 to Wildcat Creek
Little Mississinewa River	Randolph
Little Sugar Creek/Walnut Fork	Montgomery
Pleasant Run Creek	Lawrence
Salt Creek downstream of Clear Creek	Lawrence/Monroe
Stoney Creek	Hamilton
Stouts Creek	Monroe
Sugar Creek	Montgomery - from I-74 to S.R. 32
Wea Creek	Tippecanoe
Wildcat Creek	Howard/Carroll - downstream from the Waterworks Dam in Kokomo to the Tippecanoe County line

Eating fish from rivers and streams is generally a much higher concern. All 13 water bodies carrying do-not-eat consumption advisories for all species are streams. The fish consumption advisory has an extensive list of rivers and streams that have species with group 4 and 5 consumption advisories; however, many streams contain species with low levels of contaminants. Several of the major fished rivers that have some group 4 and 5 species are listed. Many of these rivers and streams contain some very good catch-and-release fisheries.

Consult the Indiana Fish Consumption Advisory for much more detailed information. The advisory can be found at IN.gov/isdh/files/2008_FCA_Booklet.pdf. For more information on the fish consumption advisory or answers to questions concerning the advisory,

contact: Indiana State Department of Health, Environmental Epidemiology Section, 2525 Shadeland Ave., Suite E, Indianapolis, IN 46219, (317) 351-7190.

Guidelines To Reduce Your Risk

- Assume that any fish you catch is a group 2 if the site in which you caught it is not listed **or** the site where you are fishing is not listed in the advisory.
- Eat smaller, less fatty fish like panfish (bluegill, perch and crappie).
- Remove fat near the skin of the fish before cooking and broil, bake, or grill fish so the fat drips away.
- Unless noted otherwise, consider all carp from rivers and streams to fall under these groups: Group 3, 15-20 in.; Group 4, 20-25 in.; Group 5, over 25 in.

Record Fish Programs and State Fish Records

The Division of Fish and Wildlife sponsors two award programs recognizing outstanding catches by sport anglers. The Indiana Record Fish Program recognizes new State Record catches. The Fish of the Year program recognizes anglers who catch the largest fish of each species that is smaller than the current state record. Weight is the measurement used for state record fish. Total length is used for Fish of the Year fish. Both programs have the same fish divisions and use the same entry form for submitting information. Winners receive a certificate and a colorful jacket patch. Entry forms and pictures will not be returned to the angler.

General Rules for Submitting an Entry:

- Fish must be taken legally by hook and line from Indiana waters. Fish taken from the main stem of the Ohio River between Kentucky and Indiana, or from the Wabash River between Illinois and Indiana will be considered for Indiana's Record Fish Program, provided the angler possessed an Indiana fishing license at the time of the catch.
- A photocopy of the angler's license must accompany an entry if a license was required

to catch fish from that body of water.

- Fish taken from water on artificial feeding programs are not eligible.
- Entry must be postmarked by Dec. 31 of the calendar year the fish was caught.
- A good-quality side-view photograph of the fish must accompany each entry. Blue catfish must be photographed from the side against a light background. For State Record Fish entries, applicants may wish to consider hiring a photographer.
- Anyone can enter and multiple entries are accepted. Fish must be caught in public or private fishing waters where there is no fee for the fish taken.
- Complete and mail the entry form below along with the following:
 1. copy of fishing license
 2. Scale Inspection Report for all State Record Fish entries only
 3. photo(s) (side view is best)

Rules for Fish-of-the-Year Entries

- Size is determined by a total length measurement or fork length for shovelnose sturgeon (see p. 15). No weight measurement is required for Fish of the Year.
- One witness, who is not a relative, who observed the length and/or weight measurement must sign the entry form.
- It is not necessary to report the location where the length measurement was taken for Fish of the Year entries.
- Provide photograph(s) of the fish (side-view) and copy of fishing license, if required.

Rules for State Record Fish Entries

- Size is determined by weight measurement first, then length, for state record fish. Both weight and length measurements are required. The weight measurement must be taken before the fish is frozen and on a scale that has been certified by the State of Indiana to be accurate to 1 ounce. If you can't find a certified scale in a grocery, hardware, grain store, or propane distributor, call the Indiana Division of Weights and Measures at (317) 356-7078 for the nearest location.
- Obtain a copy of the Scale Inspection Report from the store owner where the fish is weighed and submit the report with the entry form.
- Submit a printed meat packaging label showing the weight of the fish, if available.
- After weighing, the fish may be gutted and iced, but not filleted or otherwise cut up. The fish must be available for inspection and identification.
- State record fish entries may require verification by a Division of Fish and Wildlife fisheries biologist. It is the responsibility of the angler to schedule a time to have the fish examined by a State fisheries biologist. See page 39 for a list of fisheries biologists.
- Two witnesses, who are not relatives, who observed the length and/or weight measurement must sign the entry form.
- Provide the location information on where the fish was weighed.
- Provide side-view photograph(s) of the fish and copy of fishing license, if required.

2009 Record Fish Entry

Please print clearly. Photocopies of entry form are accepted. A good quality photo must be submitted with entry.

Where to Fish in Indiana

Indiana has more than 21,000 miles of fishable streams and rivers, along with 452 natural lakes and 580 impoundments. The table below includes DNR-owned access areas, as well as other access sites where you can boat- or bank-fish. Preferred areas are marked with an asterisk. The wheelchair symbol denotes accessible areas for persons with disabilities. Access varies per site. Site-specific

FISHING SITE BY COUNTY	LOCATION	Acres	Ramp	Motor	Shoreline Fishing	Fee

regulations may apply in addition to the information supplied by the access table. All general rules, regulations and size-and-bag limits are enforced according to this guide. Speed limits, motor size and safety regulations vary by site. It is your responsibility to read and obey all fishing and boating regulations. For maintenance problems at ramps or to offer a site for public access, call (260) 244-6805. For fisheries management information, contact a district fisheries biologist (for a list of biologists see page 39).

PROTECT INDIANA FISH AND WILDLIFE

Give TIP a call when you see poachers violating our fish, wildlife and environmental laws. You don't need to have a smoking gun, a videotape and a signed confession before you call 1-800-TIP-IDNR.

The facts that you provide to TIP can be the important piece that helps us get a major fish and wildlife law breaker out of the field.

Call 1-800-TIP-IDNR

**PROTECT
OUR
NATURAL HERITAGE**

SUPPORT
The Indiana Natural
Resources Foundation
TODAY!

Indiana's natural resources are at a critical juncture. Once a vast expanse of opportunity, the state's natural heritage has undergone fundamental changes that threaten its availability for future generations.

- *Less than 20 percent of Indiana is forested*
- *More than 86 percent of original wetlands are lost*
- *400 indigenous plant species are listed as rare, threatened or endangered*
- *31 animals are extinct, and 140 are rare, threatened or endangered*

You can help protect these rare species, grow our protected public lands, teach our children about our natural resources and restore and preserve Indiana's natural heritage by investing in the mission of the Indiana Natural Resources Foundation.

MISSION

The Indiana Natural Resources Foundation promotes, supports, assists, sustains and encourages the charitable, educational and scientific programs, projects and policies of the Indiana Department of Natural Resources.

GOALS

- *Increase Indiana's protected public land by 45,000 acres by 2016*
- *Protect Indiana's rare, threatened, or endangered species*
- *Provide a trail within 15 minutes of every Hoosier by 2016*
- *Provide an educational outdoor experience on a state-owned property for every Hoosier child*

YOUR GIFT WILL

- *Help protect Indiana's rare, threatened, or endangered species of plants and animals*
- *Expand our public lands for conservation, recreation and restoration*
- *Teach conservation and use of our natural resources to schoolchildren and visitors on our public lands*

The Indiana Natural Resources Foundation depends entirely on the voluntary support of individuals like you. Join today!

Come on Indiana, WEAR IT!

Although Indiana law only requires that every person riding on a boat have a wearable life jacket, boaters are reluctant to actually put on the life jacket. Indiana Conservation Officers encourage anglers and pleasure boaters to protect themselves by wearing life jackets, which may prevent injury in the event of an accidental fall overboard.

BE COOL.
